PROFESSIONAL SUMMARY

Network and System Administrator with 3+ years of hands-on IT experience in network infrastructure, system administration, and end-user support. Currently manages the network, business systems (Zoho, ZKTeco), and company website at Phil National Lines, Inc., and led a network infrastructure upgrade covering data cabinet and switch setup, VLAN segmentation, and structured cabling. Background in Windows Server, Active Directory, and Group Policy, backed by full-stack development skills that support scripting, automation, and business systems work.

EXPERIENCE

NETWORK AND SYSTEM ADMINISTRATOR | **Phil National Lines, Inc.** — **May 2026 – Present**

- Administer the company network and systems, maintaining switches, VLANs, and connectivity for day-to-day operations.
- Manage Zoho business applications, including user accounts, access permissions, configuration, and troubleshooting.
- Administer ZKTeco biometric attendance devices: employee enrollment, device configuration, and attendance data retrieval.
- Maintain and update the company website on Wix, handling content changes and page edits.
- Provide daily in-house IT support covering desktop and laptop hardware repair, software, network, and account issues.
- Support vessel and voyage operations with IT assistance, and take part in admin meetings and planning for upcoming IT projects.
- Currently in training to take on the IT Head role.

SERVICE DESK SUPPORT | **Support Services Group** — **Apr 2023 – Apr 2025**

- Administered user accounts, permissions, and access controls across all store systems, ensuring secure and efficient operations.
- Performed routine system maintenance, including software updates, patch deployments, and remote monitoring for stores worldwide.
- Managed store-level IT infrastructure, including asset management, network troubleshooting, hardware repairs, and connectivity maintenance.
- Monitored live store sessions remotely to proactively detect and resolve technical issues.
- Delivered real-time technical support for Sandbox VR gameplay systems, diagnosing game configuration, data, and software issues.
- Troubleshot, calibrated, and maintained VR hardware, and provided technical guidance to store managers and staff across multiple locations.

TECHNICAL ENGINEER | **Northgate Technologies Inc.** — **Mar 2022 – Aug 2022**

- Performed hardware repair and troubleshooting on desktops and laptops.
- Installed and configured operating systems, software applications, and CCTV cameras for retail stores and fast-food restaurants across the Philippines.

KEY PROJECTS

NETWORK INFRASTRUCTURE UPGRADE | **Phil National Lines, Inc.** — **2026**

- Redesigned a flat, unstructured network in which the ISP router fed switches directly out to end users, with no cabinet, segmentation, or cable management.
- Installed and set up a proper data cabinet and network switches, and removed the tangled legacy cabling.
- Configured VLANs to segment network traffic by department for better security, performance, and manageability.
- Planned and led the new structured cabling run from the IT server room to the main office.

SERVER AND NAS INFRASTRUCTURE SETUP | **Phil National Lines, Inc.** **2026**

- Set up the company server and Active Directory domain services for centralized management of users and computers.
- Created and applied Group Policy objects to standardize workstation settings and enforce access rules across the domain.
- Configured user accounts, security groups, and folder permissions to control access to company data by department.
- Implemented folder redirection so user files are stored centrally on the server instead of on individual workstations.
- Set up and configured a QNAP NAS for centralized file storage and shared department access.

IT INVENTORY MANAGEMENT AND DISPOSAL | **Phil National Lines, Inc.** **2026**

- Maintained the company IT asset inventory, tracking equipment, assignments, and condition.
- Carried out the disposal of obsolete and end-of-life IT equipment while keeping asset records accurate.

ERP SYSTEM – BUSINESS ANALYSIS | **Phil National Lines, Inc.** **2026**

- Performed business analysis for the company ERP implementation, gathering requirements from departments.
- Documented business process flows to define system workflows and guide ERP configuration.

TECHNICAL SKILLS

System Administration	Windows Server, Active Directory domain services, Group Policy, folder redirection, user and permission management, QNAP NAS, patch management, backups, system monitoring
Networking	LAN/WAN setup, routers, switches, VLAN configuration, IP configuration, structured cabling, network troubleshooting
Security	Firewalls, antivirus, access controls
Business Systems	Zoho, ZKTeco biometric attendance, Wix
Support & Assets	Hardware and software troubleshooting, remote support (TeamViewer, AnyDesk, Splashtop), IT asset inventory and disposal
Development	C#, ASP.NET Core, JavaScript, Node.js, Express.js, React.js, PHP, C++, HTML5, CSS3, Bootstrap
Databases & Cloud	SQL Server, MySQL, MongoDB, AWS (Lambda, S3, EC2)
Tools	Git, GitHub, Visual Studio Code, Postman, Sublime, Slack

EDUCATION

BS INFORMATION TECHNOLOGY | **Pamantasan ng Lungsod ng Marikina** **2017 – 2021**
Specialized in networking, systems, and programming / web development

FULL-STACK WEB DEVELOPMENT TRAINING | **Zuitt Coding Bootcamp** **2024 – 2025**

COMPUTER SYSTEMS SERVICING NC II (TESDA) | **La Salle Green Hills** **2016**
TESDA National Certificate II holder — network configuration, Active Directory, server and client setup

CERTIFICATIONS & TRAINING

- Zuitt Main Course: Full-Stack Web Development
- Zuitt Short Courses: AWS · C# ASP.NET · MySQL for MongoDB Developers

SOFT SKILLS

Problem solving · Critical thinking · Communication · Adaptability · Resilience · Time management · Continuous learning
